DETAILED ACTION

Election/Restrictions

Claim 1 is allowable. Rejoinder of claims 4-8 is proper. Accordingly, the restriction requirement of 23 July 2002 is withdrawn.

Allowable Subject Matter

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or suggest the metal co-ordination compound presently claimed. The closest prior art reference is US Patent Application 2002/0034656 A1 (**Thompson et al.**) which disclosed the claimed electroluminescent compound and its use in an electronic device as noted in the Office action filed 15 October 2003. The claims 1 and 4, as presently written, exclude hydrogen in the R₁ group, as argued by Applicant in the Amendment filed 6 February 2004, p. 6-7. Examiner wholly disagrees with Applicant's argument that Thompson does not disclose the presently claimed compound if R₁ were to include hydrogen, for reasons already of record. This argument is maintained by Applicant but remains unpersuasive to Examiner. It is also noted that groups R₁ and R₂ exclude the situation where they would form a ring including both R₁ and R₂. Otherwise, Applicant's admitted prior art would read on the present claimed. (See instant specification, p. 5, lines 20-25 showing the iridium bi-pyridinium complex.)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
